Portland General Electric Reports First Quarter 2012 Financial Results

EPS of \$0.65 per diluted share for the first quarter of 2012 2012 earnings guidance reaffirmed for \$1.85 to \$2.00 EPS

Portland, Ore, May 3, 2012 — Portland General Electric Company (NYSE: POR) today reported net income of \$49 million, or \$0.65 per diluted share, for the first quarter of 2012, compared with \$69 million, or \$0.92 per diluted share, for the first quarter of 2011. The decrease in net income was the result of a significant reduction in hydro generation, decreased energy deliveries and higher production and distribution costs for the first quarter of 2012 compared with the first quarter of 2011.

Total revenues for the first quarter of 2012 decreased \$5 million, or 1%, compared with the first quarter of 2011, due to lower volumes of energy sales and a decrease in average retail prices, partially offset by a tax credit refund to customers in the first quarter of 2011. For 2012, PGE projects that energy deliveries will be comparable to weather adjusted 2011 levels.

Purchased power and fuel expense increased \$1 million, or 1%, in the first quarter of 2012 compared with the first quarter of 2011, due to an increase in power costs of \$8 million, or 5%, offset by a reduction in total system load of \$7 million, or 3%. The average variable power cost increased to \$35.49 per MWh in the first quarter of 2012 from \$33.94 per MWh in the first quarter of 2011.

"I'm pleased with PGE's solid financial performance in the first quarter of 2012," said Jim Piro, President and Chief Executive Officer. "We've seen a significant decrease from last year's extraordinary hydro generation, but our operating performance was strong and in-line with expectations. We remain focused on managing costs, and are on track to meet our financial and operating objectives for the year."

First Quarter Operating Results

Net income for the first quarter of 2012 was \$49 million, down 29% from \$69 million for the same period last year, primarily due to: a 27% reduction in hydro generation; decreased energy deliveries; higher maintenance and operating

expenses as a result of increased generation from PGE's thermal plants; and an insurance recovery recognized in the first quarter of 2011.

Total revenues for the first quarter of 2012 were \$479 million, down 1% from \$484 million in the same period last year.

Retail revenues were \$462 million, a decrease of \$1 million compared with the same period last year, due to the net effect of: an \$8 million decrease in energy sold; a \$3 million net decrease resulting from various tariff changes effective January 1, 2012, which includes an increase due to the shortened operating life for the Boardman plant; a \$2 million decrease related to decoupling; a \$5 million increase from the refund of tax credits related to the Company's Independent Spent Fuel Storage Installation ("ISFSI") issued to customers in the first quarter of 2011, which are not applicable in 2012; a \$3 million increase in deliveries to direct access customers; and a \$4 million increase resulting from several items, the largest of which was approximately \$1 million.

Wholesale revenues in the first quarter of 2012 declined 23%, compared with the first quarter of 2011, due to a 19% decrease in sales volume and a 2% decrease in average price. Lower wholesale power prices were driven by low natural gas prices.

Purchased power and fuel expense for the first quarter of 2012 was \$195 million, an increase of \$1 million, or 1%, compared with the first quarter of 2011.

Power costs increased \$8 million or 5%, compared with the same period last year, primarily due to a reduction in hydro generation and higher fuel costs for thermal generation, offset by a \$7 million decrease in power costs due to a 3% decline in total system load.

Energy received from hydroelectric resources decreased 27% quarter over quarter, and was 6% above the levels projected in PGE's 2012 annual power cost update tariff ("AUT") for the current quarter, compared with 16% above the 2011 AUT projected values in the first quarter of last year. Thermal generation represented 40% of PGE's total system load in the first quarter of 2012, compared with 24% in the first quarter of 2011, when lower-cost purchased power and increased hydro generation economically displaced a significant amount of PGE's thermal generation. Wind generation from our Biglow Canyon wind farm increased 13%, quarter over quarter, due to improved wind conditions.

For the first quarter of 2012, actual net variable power costs ("NVPC") were approximately \$5 million below baseline NVPC and within the lower deadband of the power cost adjustment mechanism ("PCAM"). As forecasted, NVPC for the year ending December 31, 2012 is currently estimated to be below the baseline NVPC but within the established deadband range for fiscal year 2012. As a result, no estimated refund to customers was recorded as of March 31, 2012. For the same quarter last year, actual NVPC was approximately \$19 million below baseline NVPC, with PGE recording an estimated refund to customers of approximately \$4 million.

Production and distribution expense was \$53 million for the first quarter of 2012, an increase of \$11 million, or 26%, compared with the first quarter of 2011. The increase, quarter over quarter, was primarily due to: increases in operating and maintenance costs at the Company's thermal generating plants as a result of a 58% increase in thermal generation; higher delivery system costs; and an insurance recovery related to the Selective Water Withdrawal project recorded in the first quarter of 2011.

Administrative and other expense was \$54 million, an increase of \$2 million, or 4%, in the first quarter of 2012 compared with the first quarter of 2011 due to higher employee pension expenses resulting from a lower discount rate and return on pension trust assets.

Depreciation and amortization expense was \$62 million, an increase of \$6 million, or 11%, in the first quarter of 2012, compared with the first quarter of 2011. The increase was primarily due to the amortization of ISFSI tax credits ending in December 2011 and a shorter operating life for the Boardman plant, effective in the third quarter of 2011,

which was partially offset by a deferral of costs, as approved in the 2011 General Rate Case, related to four capital projects.

2012 Earnings Guidance

PGE's 2012 earnings are expected to be within the previously disclosed guidance range of \$1.85 to \$2.00 per diluted share. Guidance is based on the following assumptions:

- Retail energy deliveries approximately 1% to 1.5% higher than weather adjusted 2011 levels, excluding certain paper customers that do not significantly impact the Company's gross margin;
- Normal thermal plant availability, and hydro generation slightly above projections included in the AUT;
- Wind estimates based on wind studies completed in connection with the permitting of the wind farm;
- Operating and maintenance costs in line with expectations; and
- Capital deferrals of \$17 million for the current year, with \$4 million reported in the first quarter.

First Quarter 2012 Earnings Call and Web cast — May 3, 2012

PGE will host a conference call with financial analysts and investors on Thursday, May 3, 2012, at 11 a.m. EDT. The conference call will be web cast live on the PGE website at www.PortlandGeneral.com. A replay of the call will be available beginning at 2 p.m. EDT on Thursday, May 3, 2012 through Thursday, May 10, 2012.

Jim Piro, President and CEO; Maria Pope, Senior Vice President, Finance, CFO, and Treasurer; and Bill Valach, Director, Investor Relations, will participate in the call. Management will respond to questions following formal comments.

The attached condensed consolidated statements of income, condensed consolidated balance sheets, and condensed consolidated statements of cash flows, as well as the supplemental operating statistics, are an integral part of this earnings release.

#####

About Portland General Electric Company

Portland General Electric Company is a vertically integrated electric utility that serves approximately 825,000 residential, commercial and industrial customers in the Portland/Salem metropolitan area of Oregon. The Company's headquarters are located at 121 SW Salmon Street, Portland, Oregon, 97204. Visit PGE's website at www.PortlandGeneral.com.

Safe Harbor Statement

Statements in this news release that relate to future plans, objectives, expectations, performance, events and the like may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements regarding earnings guidance; statements regarding future load, hydro conditions and operating and maintenance costs; statements concerning implementation of the Company's Integrated Resource Plan; statements concerning future compliance with regulations limiting emissions from generation facilities and the costs to achieve such compliance; as well as other statements containing words such as "anticipates," "believes," "intends," "estimates," "promises," "expects," "should," "conditioned upon," and similar expressions. Investors are cautioned that any such forward-looking statements are subject to risks and uncertainties, including reductions in demand for electricity and the sale of excess energy during periods of low wholesale market prices; operational risks relating to the Company's generation facilities, including hydro conditions, wind conditions, disruption of fuel supply, and unscheduled plant outages, which may result in unanticipated operating, maintenance and repair costs, as well as replacement power costs; the costs of compliance with environmental laws and regulations, including those that govern emissions from thermal power plants; changes in weather, hydroelectric and energy market conditions, which could affect the availability and cost of purchased power and fuel; changes in capital market conditions, which could affect the availability and cost of capital and result in delay or cancellation of capital projects; problems or delays in completing capital projects, resulting in the abandonment of such projects or the failure to complete such projects on schedule or within budget, which could result in the Company's inability to recover project costs; the outcome of various legal and regulatory proceedings; and general economic and financial market conditions. As a result, actual results may differ materially from those projected in the forward-looking statements. All forward-looking statements included in this news release are based on information available to the Company on the date hereof and such statements speak only as of the date hereof. The Company assumes no obligation to update any such forward-looking statement. Prospective investors should also review the risks and uncertainties listed in the Company's most recent Annual Report on Form 10-K and the Company's reports on Forms 8-K and 10-Q filed with the United States Securities and Exchange Commission, including Management's Discussion and Analysis of Financial Condition and Results of Operations and the risks described therein from time to time.
