

Investor Presentation

Portland General Electric
August 2019

Cautionary statements

Information Current as of August 2, 2019

Except as expressly noted, the information in this presentation is current as of August 2, 2019 — the date on which PGE filed its Quarterly Report on Form 10-Q for the quarter ended June 30, 2019 — and should not be relied upon as being current as of any subsequent date. PGE undertakes no duty to update this presentation, except as may be required by law.

Forward-Looking Statements

Statements in this presentation that relate to future plans, objectives, expectations, performance, events and the like may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements include statements regarding earnings guidance; statements regarding future load, hydro conditions and operating and maintenance costs; statements concerning implementation of the company’s integrated resource plan; statements concerning future compliance with regulations limiting emissions from generation facilities and the costs to achieve such compliance; as well as other statements containing words such as “anticipates,” “believes,” “intends,” “estimates,” “promises,” “expects,” “should,” “conditioned upon,” and similar expressions. Investors are cautioned that any such forward-looking statements are subject to risks and uncertainties, including reductions in demand for electricity; the sale of excess energy during periods of low demand or low wholesale market prices; operational risks relating to the company’s generation facilities, including hydro conditions, wind conditions, disruption of fuel supply, and unscheduled plant outages, which may result in unanticipated operating, maintenance and repair costs, as well as replacement power costs; failure to complete capital projects on schedule or within budget, or the abandonment of capital projects, which could result in the company’s inability to recover project costs; the costs of compliance with environmental laws and regulations, including those that govern emissions from thermal power plants; changes in weather, hydroelectric and energy markets conditions, which could affect the availability and cost of purchased power and fuel; changes in capital market conditions, which could affect the availability and cost of capital and result in delay or cancellation of capital projects; the outcome of various legal and regulatory proceedings; general economic and financial market conditions; severe weather conditions, wildfires, and other natural phenomena and natural disasters that could result in operational disruptions, unanticipated restoration costs, or liability for third party property damage; and cyber security breaches of the company’s customer information system or operating systems, which may affect customer bills or other aspects of our operations. As a result, actual results may differ materially from those projected in the forward-looking statements. All forward-looking statements included in this presentation are based on information available to the company on the date hereof and such statements speak only as of the date hereof. The company expressly disclaims any current intention to update publicly any forward-looking statement after the distribution of this presentation, whether as a result of new information, future events, changes in assumptions or otherwise. Prospective investors should also review the risks, assumptions and uncertainties listed in the company’s most recent annual report on form 10-K and in other documents that we file with the United States Securities and Exchange Commission, including management’s discussion and analysis of financial condition and results of operations and the risks described therein from time to time.

The company

PGE at a glance

Quick facts

- Vertically integrated electric company encompassing generation, transmission and distribution
- 888,000 customers in 51 Oregon incorporated cities
- 46 percent of Oregon's population lives within PGE service area
- 75 percent of Oregon's commercial and industrial activity occurs in PGE service area

Financial snapshot

- 2018 revenue: \$2.0 billion
- 2018 diluted earnings per share: \$2.37
- Net utility plant assets: \$7.0 billion*

3,800+ MWs of Generation

Attractive, growing service area

- 1%+ average annual customer count growth⁽¹⁾
- Above-average population growth due to in-migration⁽²⁾
- Oregon's annual GDP growth averaged 2.8% over the past two decades⁽³⁾
- Industrial segment growth driven by high tech and data centers
- Unemployment in our service area remains low at 3.5%, lower than the Oregon rate of 4.1% and the U.S. rate of 3.7%⁽⁵⁾

1. Forecasted growth until 2025
2. Oregon Office of Economic Analysis, Oregon Economic and Revenue Forecast, May 2019
3. U.S. Bureau of Economic Analysis
4. Sector load growth shown is net of energy efficiency
5. State of Oregon Employment Department, June 2019

Constructive regulatory environment

Regulatory construct

- Public Utility Commission of Oregon
- Forward test year
- Integrated Resource Planning (IRP)
- Renewable Portfolio Standard (RPS)
- Proven track record of achieving reasonable settlements

Regulatory mechanisms

- Net variable power cost recovery
 - Annual Power Cost Update Tariff (AUT)
 - Power Cost Adjustment Mechanism (PCAM)
- Decoupling through 2022
- Renewable Adjustment Clause (RAC)

Regulatory body

Governor-appointed three member commission serving four-year terms

	Term expiration
Megan Decker [D] (Chair)	March 2021
Stephen Bloom [R]	Nov 2019
Letha Tawney [D]	May 2020

2019 general rate case

Key Items

- Approved price increase: 0.5%
- Return on equity (ROE): 9.5%
- Cost of long-term debt: 5.1%
- Capital structure: 50% debt, 50% equity
- Rate base: \$4.75 billion

Requests approved by the Commission:

- Energy storage projects associated with renewables can be included in future Renewable Adjustment Clause (RAC) filings for cost recovery pursuant to a showing of prudence and an appropriate nexus of the storage facility with renewables
- Use of trended weather method in the load forecast for price setting purposes
- Decoupling added customers with demands of up to 200 kW and was extended through 2022

Key strengths

Focus on customers

**Top quartile
system

Diverse generation and customer base

Power sources as a percent of retail load
2018 general rate case*

Total = 2,105 MWa

Retail revenues by customer class
2018

Total retail revenues = \$1.8B

High-quality utility operations

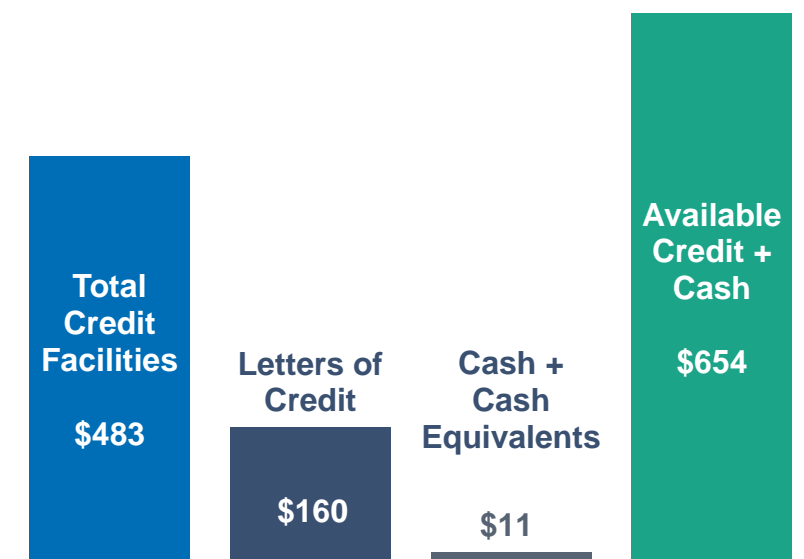

Western Energy Imbalance Market

- Highly-dependable generation fleet with seven-year average availability of 92%*
- Strong power supply portfolio management and western EIM integration to enhance reliability and optimize resources
- Progressive approach to reduce coal generation
- Investment plans to provide safer and more reliable service to our customers
- Smart grid opportunities to incorporate more renewables, decarbonize, power the transportation network and integrate demand side resources

Strong liquidity position for growth

Revolving credit facilities* (\$ in millions)

Financial resources

- Investment grade credit ratings
- Manageable debt maturities
- Target capital structure of 50% debt and 50% equity

	S&P	Moody's
Senior Secured	A	A1
Senior Unsecured	BBB+	A3
Outlook	Positive	Stable

Solid financial performance

Net income, earnings per share, and ROE

1. 2017 contains adjusted earnings that are not determined in accordance with generally accepted accounting principles (GAAP). Management uses non-GAAP financials to communicate the company's expectations regarding its past and future earnings and assist with the analysis of the company's financial performance. 2017 displays full-year non-GAAP adjusted earnings, which excludes the negative impact of the Tax Cuts and Jobs Act expense (\$0.19 EPS)

2. GAAP earnings for year-end 2017 were \$187 million or \$2.10 per diluted share

3. Estimates and projections are based on assumptions and there can be no assurance regarding the amount of future earnings.

Proven dividend growth

1. Compound Annual Growth Rate from 2010 through 2019
2. Compound Annual Growth Rate from 2015 through 2019
3. Estimates and projections are based on assumptions and there can be no assurance regarding the amount of future earnings, cash flows and other factors influencing dividends, which are subject to approval by the Board of Directors.
4. Represents annual dividends paid
5. Dividend payout ratio prior to 2018 was 50%-70%

Looking Forward

Clean and reliable energy future

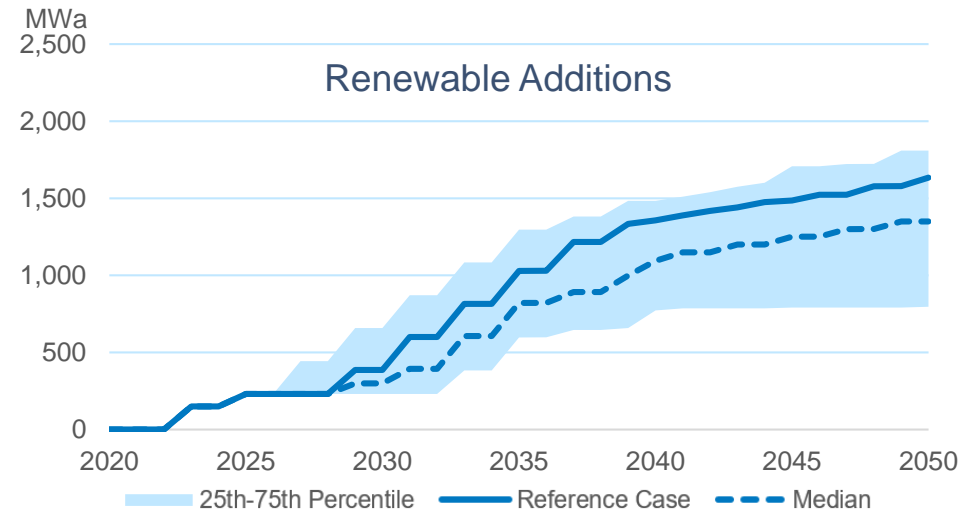

Key elements

- Transition PGE customers off coal-fired generation by 2030
- Production tax credits included in annual power cost filings since 2017
- Pursue transportation electrification

Long-term strategy

- Layered approach balances near-term and long-term risks and benefits for customers
- Incremental renewable actions reduce near-term carbon emissions and puts PGE on track to meet Oregon's carbon reduction goal

Renewable Portfolio Standard

2016 Integrated Resource Plan

A flexible, balanced plan that reflects our commitment to a low-carbon future and pursuant to the Oregon Clean Electricity Plan

Renewables

- Procured renewables (100 MWa) to help ensure Oregon Clean Electricity Plan
 - Wheatridge Renewable Energy Facility:
 - Split ownership and PPA*
 - Resource capacity:
 - Wind 300 MW online in 2020
 - Solar 50 MW online in 2021
 - Battery 30 MW online in 2021

Capacity need

- Executed contracts for 300 MWs through RFP procurement process:
 - 200 MW of annual capacity with five-year terms beginning 2021
 - 100 MW of seasonal peak capacity during summer and winter periods with a five-year term beginning 2019

2019 Integrated Resource Plan

The plan reflects our focus on meeting customer needs and addressing stakeholder feedback.

Action Plan

- **Customer resource actions** - increased energy efficiency, demand response, storage and dispatchable standby generation
- **Renewable resource actions** - a renewable RFP of 150 MWa, estimated online 2023
- **Capacity resource actions** - a multi-stage procurement process for up to 595 MW total of cost-competitive capacity
 - Pursue cost-competitive agreements for existing capacity in the region
 - Conduct an RFP for remaining capacity needs

Integrated Operations Center

A new 24/7 center for key operations:

- Advances our integrated grid strategy
- Significantly improves seismic resilience, cyber and physical security
- Improves monitoring, control and optimization of distributed assets and our distribution system

Smart grid strategies

Building a smarter more resilient grid:

- New communication systems
- Distributed automation systems
- Data analytics
- Integrate customers' energy resources
- Utility-scale battery storage

Forecasted capital expenditures

Outlook*

- Updating, replacing aging generation, transmission and distribution equipment
- Investments to construct the Integrated Operations Center
- Strengthening the power grid for earthquakes, cyberattacks and other potential threats
- Adding 100 MW of wind generation at Wheatridge Renewable Energy Facility

Portland General Electric Appendices

Recovery of power costs

Annual power cost update tariff

- Annual reset of prices based on forecast of net variable power costs (NVPC) for the coming year
- Subject to OPUC prudence review and approval, new prices go into effect on or around January 1 of the following year

Power Cost Adjustment Mechanism (PCAM)

- PGE absorbs 100% of the costs/benefits within the deadband, and amounts outside the deadband are shared 90% with customers and 10% with PGE
- An annual earnings test is applied using the regulated ROE as a threshold
- Customer surcharge occurs if PGE's actual regulated ROE is below 8.5%; ROE will not exceed 8.5% with surcharge
- Customer refund occurs if PGE's actual regulated return is above 10.5%; regulated return will not decrease below 10.5% with refund

Renewable portfolio standard

Additional renewable resources

- As of 2017, PGE had the following qualifying renewable resources:

Type of Resource	% of Retail Load
Wind	9.4%
Low-Impact Hydro	2.5%
Solar & Other	0.7%

Renewable Portfolio Standard:

2011	2015	2020	2025	2030	2035	2040
5%	15%	20%	27%	35%	45%	50%

- Renewable Portfolio Standard qualifying resources and Renewable Energy Certificates (RECs) supplied approximately 10% of PGE's retail load in 2012, 2013, and 2014, and approximately 15% of retail load in 2015, 2016 and 2017

Renewable Adjustment Clause (RAC)

- Renewable resource can be tracked into prices, through an automatic adjustment clause, without a general rate case. Using Schedule 122, prices go into effect on the resource's in-service date and are updated annually. Upon Commission approval of the subsequent general rate case the renewable resource is included in base prices and Schedule 122 goes back to zero

Decoupling Mechanism

The decoupling mechanism is intended to allow recovery of margin lost due to a reduction in sales of electricity resulting from customers' energy efficiency and conservation efforts.

This includes a Sales Normalization Adjustment (SNA) mechanism for residential and small nonresidential customers (≤ 30 kW) and a Lost Revenue Recovery Adjustment (LRRRA), for large nonresidential customers (between 31 kW and 1 MWa). In PGE's 2019 general rate case, the Commission approved* the inclusion of nonresidential customers with demands of up to 200 kW in the SNA mechanism beginning in 2019.

- The SNA is based on the difference between actual usage per customer and that projected in PGE's 2019 general rate case. The SNA mechanism applies to approximately 77% of 2019 customer revenues
- The LRRRA is based on the difference between actual energy-efficiency savings (as reported by the ETO) and those incorporated in the applicable load forecast. The LRRRA mechanism applies to approximately 13% of 2019 customer revenues

Recent Decoupling Results

(\$ in millions)	2014	2015	2016	2017	2018
Sales Normalization Adjustment	\$(6.6)	\$(8.8)	\$1.9	\$11.6	\$(1.3)
Lost Revenue Recovery Adjustment	\$1.4	\$(0.5)	\$(0.8)	\$(0.4)	\$(1.1)
Total adjustment	\$(5.2)	\$(9.3)	\$1.1	\$11.2	\$(2.4)

Note: refund = (negative) / collection = positive

Average retail price comparison

Residential and Commercial - Winter 2019

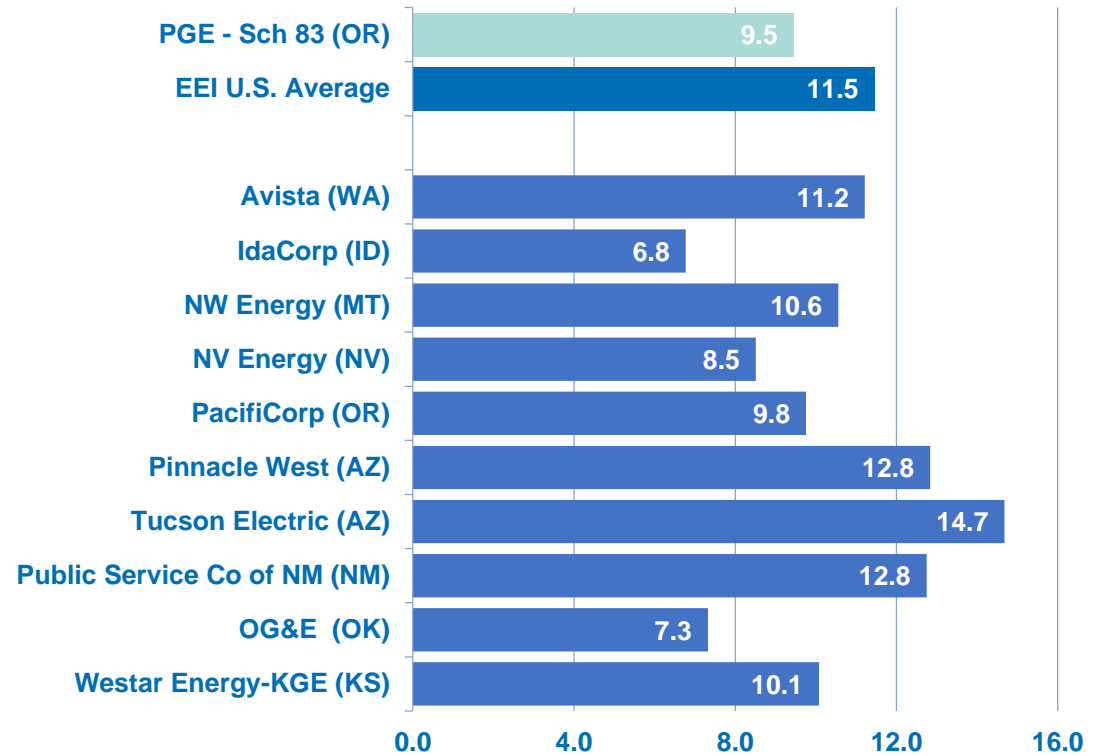

Residential Electric Service Prices:

1,000 kWh monthly consumption.
(Prices in cents per kWh)

Commercial Electric Service Prices:

40 kW demand and 14,000 kWh monthly consumption.
(Prices in cents per kWh)

Notes:
